Dear Doctor Bras

Of course, I should be very glad to meet you and discover the activities of the Croatian Association for Palliative Medicine of the Croatian Medical Association, and the development of palliative medicine in Croatia.

May be, my friend Damir SINKOVIC told you about my works for palliative cares in Southern Normandy since 1996. I was lucky enough to set up one mobile team for palliative care ( one doctor, two nurses, secretary, psychologist...) for about 200.000 people. I was also the first President for Voluntary Helpers in Palliative Care in the Council. We also have Pain Unit ( two doctors and one nurse ) and an « Hospice » in Caen for palliative care.

Nowadays, Palliative Care is well known and put in practice, but we still have a lot to do for these measures should benefit any patient who wish or need them.

Because of my job – oncology and medical Council – and because of my own beliefs, I should be very glad to help you for your projects, and the campaign « Stand by me » all along the year.

At first, I send you a summary of my last work in palliative care. I shall speak doctors who work in palliative care about your action. I hope somebody ( who would be younger and speaks english better than me ), will be OK to go to Croatia on October 9<sup>th</sup> for instance, and I should try to go with.

Congratulations and best regards.

Dr M BIENVENU.
